### Employment status

Student

### Reason you applied for aid

Currently, I am a Student in SIES Graduate School of Technology in Nerul, Navi Mumbai. My family currently is in a financial crunch with the current home loans and my college fees. As a student in AIML want to pursue this field and contribute valuable insights and research to further develop the field of AI. I aim to become a Data Scientist or an AI/ML engineer who works to solve traditional problems and improve existing methods, with the goal of making life easier and more effortless for people. I am choosing this course as it directly aligns with my goals and receiving financial aid would help me access high-quality learning which I currently cannot afford. I currently am in a position where I cannot place any further financial strain on my family, hence receiving the aid would help me grow effortlessly. I am fully committed to completing the course and apply my knowledge to real world challenges. I am a full-time student and currently do not have any personal income. I am financially dependent on my family, who are already under financial pressure due to home loans and my education expenses.

### Amount you can pay

₹500

### Course goals

I am choosing this course because it directly aligns with my academic and career goals in Artificial Intelligence and Machine Learning. The topics covered will provide me with the essential knowledge and currently required practical skills I need to advance in this field. Unfortunately, I am currently unable to afford the course fee due to financial constraints. Receiving financial aid would allow me to access this high-quality learning opportunity that I would otherwise not be able to afford. At this time, my family is already under financial strain because of home loans and my college fees, and I am not in a position to add any further burden. Receiving this aid would relieve that pressure and enable me to focus entirely on my studies without distraction. I am fully committed to completing the course successfully and applying the skills and knowledge I gain to real-world challenges in AI and machine learning.
